

Asset Management is part of the IoT solution and tracks, records, monitors and maintains tangible and intangible company assets. The process involves developing, operating, maintaining, upgrading, and disposing of assets cost-effectively.

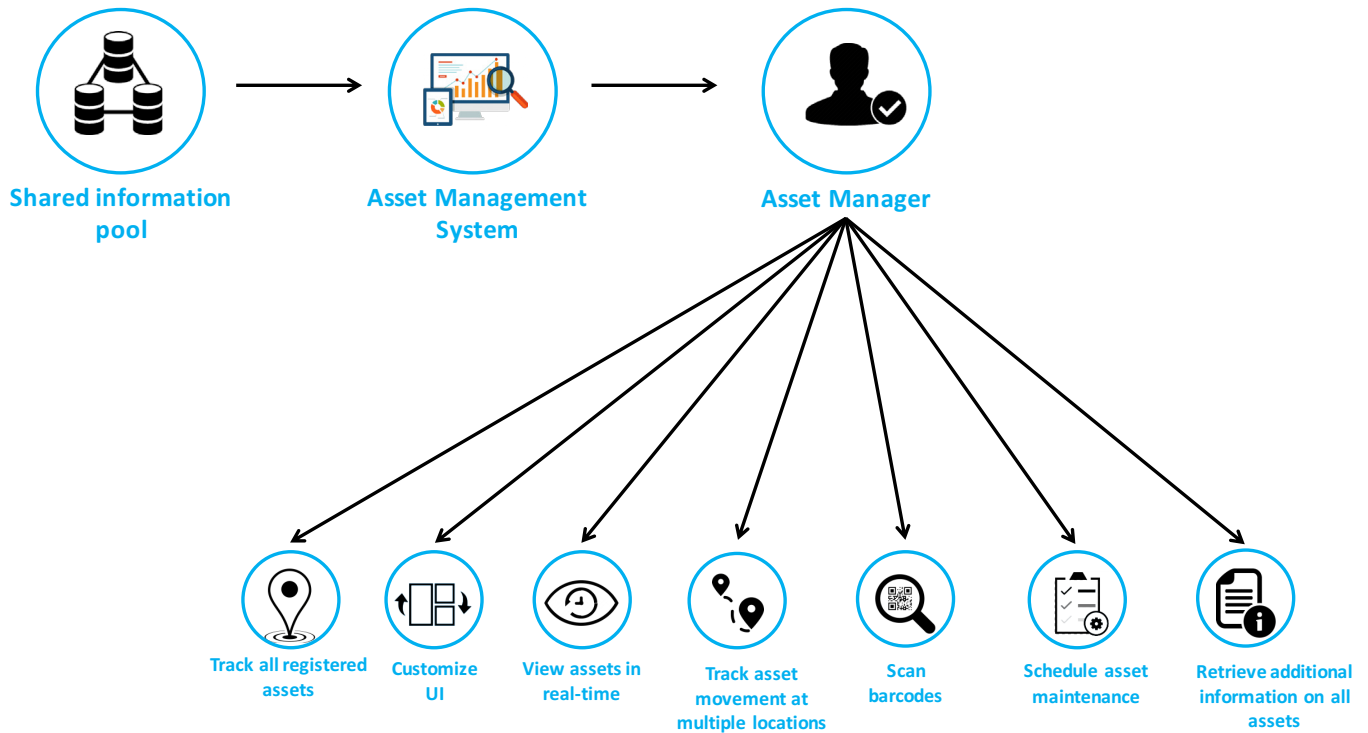

Key Features:

- ✓ Tracks all registered assets.
- ✓ Provides a highly customizable user interface.
- ✓ Views assets in real-time.
- ✓ Tracks asset movement at multiple locations.
- ✓ Scans barcodes.
- ✓ Schedules asset maintenance.
- ✓ Provides a searchable, clearly represented asset list.

Benefits:

- ✓ Management and decision-makers have an easy-to-understand interface, which provides status, location, maintenance/upgrade schedules and other pertinent information of all listed assets.
- ✓ Employees can use the module to collect additional information on specific assets, including photographic material, serial numbers, scan asset barcodes, and record asset data.

How it Works:
