

MOBILE DEVICE PROVISIONING (MDP)

Mobile Device Provisioning (MDP) is part of the IoT solution, and allows your organization's IT department to provision all company devices from a central point. Provisioning is the process whereby companies can ensure that standard security protocols are established and enforced.

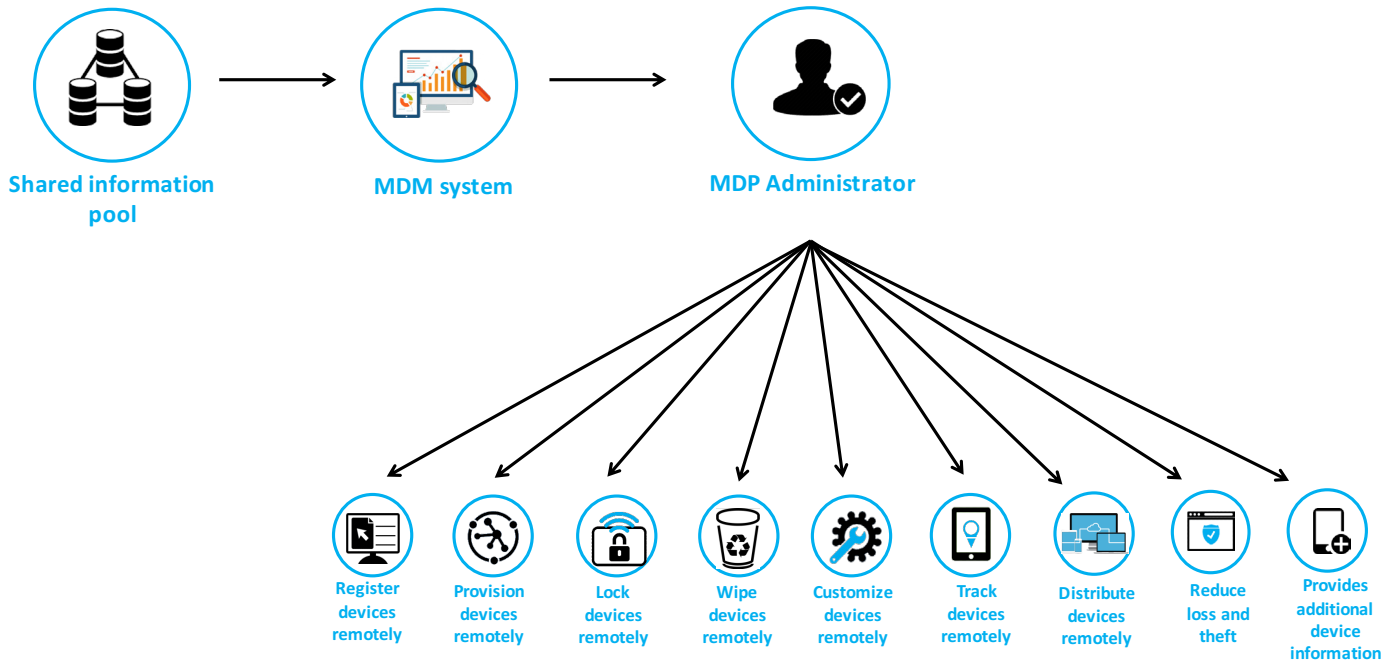

Key Features:

- ✓ Enables the Administrator to register, provision, lock or wipe the device remotely.
- ✓ Provides the Administrator with a web-based interface and the ability to customize company devices according to CI, preferences and themes.
- ✓ Provides additional device details, including specifications and location.

Benefits:

- ✓ Enables fast implementation and distribution of provisioned devices.
- ✓ Reduces loss and theft.
- ✓ Tracks company devices.

How it Works:
