

**Revenue Management** is part of the Analytics solution. It provides an automated, auditable solution for Mobile Financial Services (MFS) providers who must perform telecommunications call data collection and processing for auditing purposes. This process is performed continuously with the primary aim of revenue calculation and reporting.

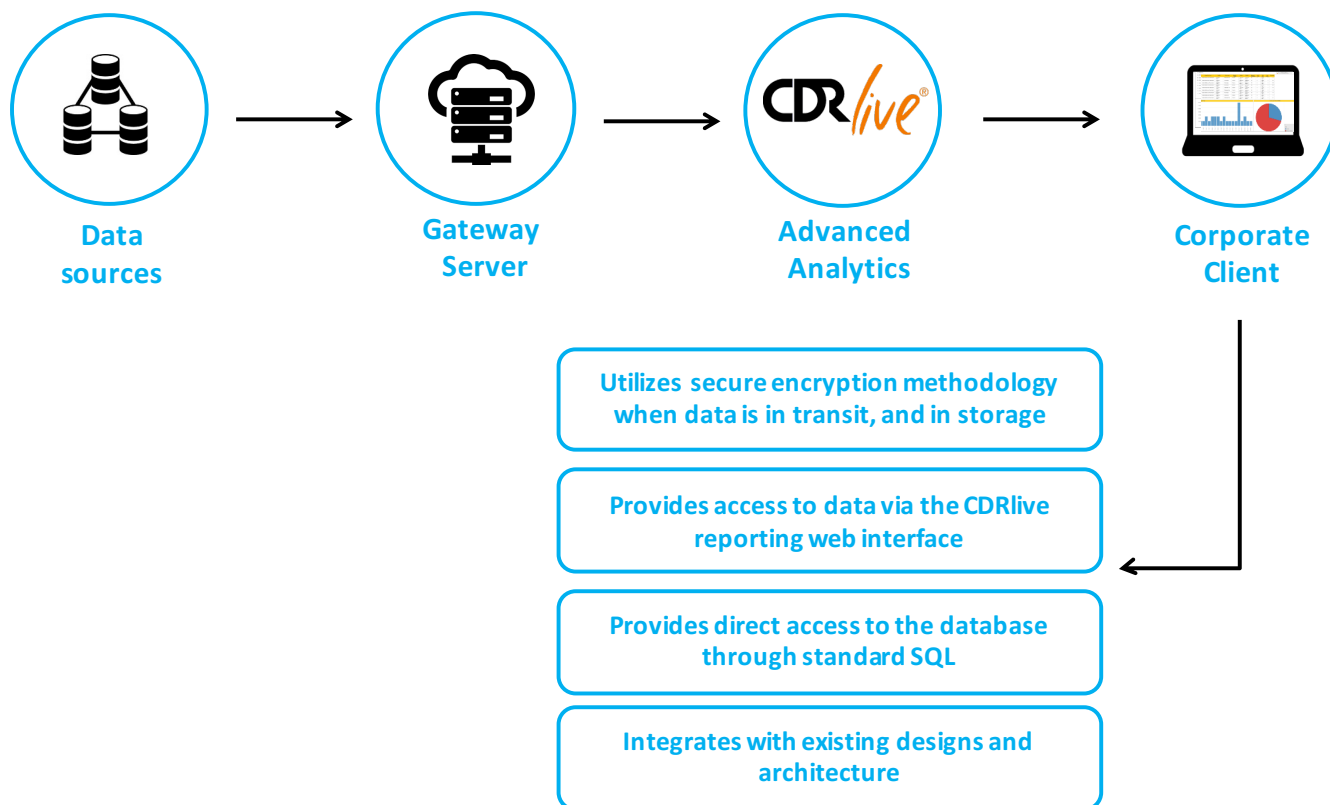

### Key Features:

- ✔ Utilizes secure encryption methodology when data is in transit, and in storage.
- ✔ Provides access to data via the CDRlive reporting web interface.
- ✔ Provides direct access to the database through standard SQL.
- ✔ Integrates with existing designs and architecture.

### Benefits:

- ✔ Enables informed decision-making through detailed indicators, reports and insights.
- ✔ Supports e-mail alerting to designated personnel.
- ✔ Provides audit, trace and logging functionality to review the processing accuracy of the system at any time.
- ✔ Requires minimal configuration changes from major vendors.
- ✔ Automatically provides reconciliation and validation of data.

## How it Works:
